

Reusables: Good for customers, planet and business

Because when that juicy bite brings a smile to a child's face, it's not just about the moment—it's about the care that went into it from source to table.

The transformative impact of Tosca reusables

Up to 53%
labor savings

Up to 66%
emissions reduction

Up to 50%
reduced shrink

Up to 25%
increased cube

Up to 50%
higher bulk bin stacks

Reusables raise your bottom line, lower your footprint

Slash costs, drive sales

Transportation savings, packaging savings, faster restocking

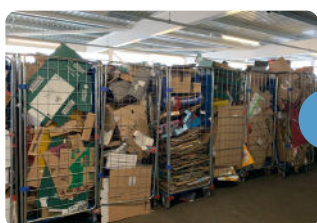

Protect product quality

Reduce shrink, optimize for freshness, prevent contamination, higher stacks

Boost efficiency

More organized backrooms, traceability, eliminate machine jams from debris

Impact sustainability goals

Eliminate landfill waste, reduce CO₂ emissions, reduce energy and water use

From **source** to **shelf**, we have you covered

Tosca's full suite of reusable assets optimize all your supply chain needs and cover all commodities; including upstream and downstream: CRM, Eggs, Poultry, Produce, Cheese, Seafood, Food Ingredients, and more.

Reusable plastic containers (RPCs)

4x stronger

Than corrugated, eliminating box crush damage.

Standard sizing

Automation ready, stable stacks, better storage & backroom organization.

Zero waste and labor time savings

100% recyclable and no time spent on bailing.

Ventilated

For faster cooling, thawing and for optimal ripening.

Transportation savings

Higher stacking & better cube-utilization leads to 25% fuller trucks.

Retail ready RPCs

Easy and faster stocking process.

Bulk bins

Eliminate pallet and tertiary packaging

No need for wooden pallets, straps or quarter boards, reducing costs. bins.

Reduce floor space

Stack the bins to more than twice the current height.

Lower CO₂ emissions

Maximize return transport capacity, reducing the number of trips needed.

Lower transportation costs

Fit 182 empty bins compared to 26 rigid bins.

Labor efficiency

Foldable bulk bins require no assembly or disassembly, saving time and labor costs.

Reduce food waste

Maximum discharge, hardly any residue compared to rigid containers.

Plastic pallets

Eliminate contamination and machine jams

Clean and debris-free pallet, every time.

Easy-to-clean, food-grade plastic

Helps maintain essential hygiene and food safety standards.

Support sustainability

Made from 100% recyclable and reusable plastic, it lasts significantly longer.

Ensure hygiene and safety

Bacteria-resistant, non-porous plastic that doesn't absorb moisture or contaminants.

Designed to withstand the rigors of supply chain

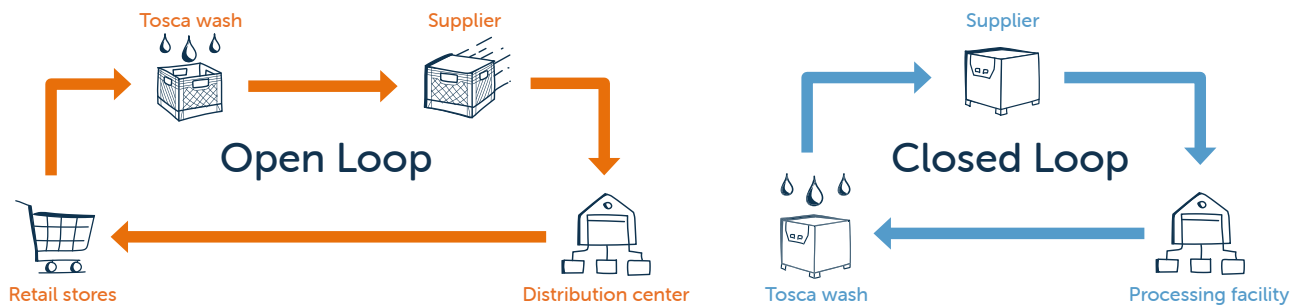

Reducing the need for frequent replacements and minimizing waste.

Optimized for automation

Our standard-sized plastic pallets improve efficiency and reduce handling costs.

Switching to reusables made **simple** with Tosca pooling

We handle the heavy lifting, from capital investment to customized asset design.
Our robust portfolio and efficient management ensure optimal supply chain performance, reduced costs, and enhanced sustainability.

Assess, select, implement: Your reusable journey **simplified**

You and your team will be guided through each step.

Let's get started
